## Tamkang University Academic Year 103, 2nd Semester Course Syllabus

| Course Title  | DESIGN OF EXPERIMENTS  | Instructor     | CHEN SHUN-YI   |
|---|--|----------------|--|
| Course Class  | TSMCB4A<br>DEPARTMENT OF MATHEMATICS (SECTION OF<br>DATA SCIENCE AND MATHEMATICAL            | Details        | <ul> <li>Selective</li> <li>2nd Semester</li> <li>3 Credits</li> </ul> |
|   | Departmental Aim of Educ   | ation          |  |
| I. To tead  | h knowledge in mathematics.  |                |  |
| II. To trai   | n teaching professionals in mathematics.   |                |  |
| III. To dev   | elop independent and creative thinking.  |                |  |
| IV. To esta   | blish ability to present oneself.  |                |  |
| V.To pro  | mote cooperative working spirit.   |                |  |
| VI. To pre  | pare self learning ability in multiple areas.  |                |  |
|   | Departmental core compet   | e n c e s      |  |
| A. To learn   | the fundamentals of mathematics.   |                |  |
| B. To deve  | op independent and logical thinking ability.   |                |  |
| C. To learn   | basics of probability and statistic.   |                |  |
| D. To use the aid of computer in solving mathematical and statistical problems.   |  |                |  |
| E. To obtai   | E. To obtain the ability to collect and analyze data.  |                |  |
| F. To establish ability to pursue knowledge in advanced mathematics.  |  |                |  |
|   | This course will cover the statistical concepts and techniques                               | of experimen   | tal  |
|   | design as a tool for scientists to use for product design and process development            |                |  |
| as well as improvement. We will introduce basic statistical methods, analysis of variance, factorial experiments, fractional factorial designs, nested and split-plot |  |                |  |
| Introduction  | designs, and response surface methodology. Students are ex                                   | pected to lear | n that   |
|   | the use of experimental design can substantially reduce deve                                 | elopment lead  | time   |
|   | and cost, leading to processes and products that perform better and have higher reliability. |                |  |
|   |  |                |  |
|   |  |                |  |
|   |  |                |  |
|   |  |                |  |
|   |  |                |  |

## The Relevance among Teaching Objectives, Objective Levels and Departmental core competences

| I.Objective Levels (select | applicable ones)  | :                  |                           |
|----------------------------|-------------------|--------------------|---------------------------|
| (i) Cognitive Domain :     | C1-Remembering,   | C2-Understanding,  | C3-Applying,              |
|                            | C4-Analyzing,     | C5-Evaluating,     | C6-Creating               |
| (ii) Psychomotor Domain :  | Pl-Imitation,     | P2-Mechanism,      | P3-Independent Operation, |
|                            | P4-Linked Operati | on, P5-Automation, | P6-Origination            |
| (iii) Affective Domain :   | Al-Receiving,     | A2-Responding,     | A3-Valuing,               |
|                            | A4-Organizing,    | A5-Charaterizing,  | A6-Implementing           |

II.The Relevance among Teaching Objectives, Objective Levels and Departmental core competences :
 (i) Determine the objective level(s) in any one of the three learning domains (cognitive,

- psychomotor, and affective) corresponding to the teaching objective. Each objective should correspond to the objective level(s) of ONLY ONE of the three domains.
- (ii) If more than one objective levels are applicable for each learning domain, select the highest one only. (For example, if the objective levels for Cognitive Domain include C3,C5,and C6, select C6 only and fill it in the boxes below. The same rule applies to Psychomotor Domain and Affective Domain.)
- (iii) Determine the Departmental core competences that correspond to each teaching objective. Each objective may correspond to one or more Departmental core competences at a time.(For example, if one objective corresponds to three Departmental core competences: A,AD, and BEF, list all of the three in the box.)

|     |  |   |                          | Relevance                        |  |
|-----|--|---|--------------------------|----------------------------------|--|
| No. | Teaching Objectives  |   |                          | Departmental core<br>competences |  |
| 1   | Students will be able to acquire the ability of the statistical concepts and techniques of experimental design in related problems.          |   |                          | CE                               |  |
|     | Teaching Object  | ives, Teaching Methods and Assessme                   | ent                      |                                  |  |
| No. | Teaching Objectives  | Teaching Methods                                      |                          | Assessment                       |  |
| 1   | Students will be able to acquire the<br>ability of the statistical concepts and<br>techniques of experimental design<br>in related problems. | Lecture, Discussion, Appreciation,<br>Problem solving | Written to<br>Participat | est, Report,<br>tion             |  |

|  | Т                        | his course has been designed to                                 | cultivate the following essential qualities   | in TKU students |  |
|--|--------------------------|---|---|-----------------|--|
| Essential Qualities of TKU Students                      |                          | Qualities of TKU Students                                       | Description   |                 |  |
| ◆ A global perspective                                   |                          | ective  | Helping students develop a broader perspective from which to understand international affairs and global development.                                   |                 |  |
| • i  | Information lit          | eracy   | Becoming adept at using information technology and learning the proper way to process information.  |                 |  |
| \$,  | A vision for the         | e future  | Understanding self-growth, social change, and technological development so as to gain the skills necessary to bring about one's future vision.          |                 |  |
| $\Diamond$ ı   | Moral integrity          | /   | Learning how to interact with others, practicing empathy and caring for others, and constructing moral principles with which to solve ethical problems. |                 |  |
| • 1  | Independent t            | hinking   | Encouraging students to keenly observe and seek out the source of their problems, and to think logically and critically.                                |                 |  |
| $\diamondsuit$ A cheerful attitude and healthy lifestyle |                          | tude and healthy lifestyle                                      | Raising an awareness of the fine balance between one's body<br>and soul and the environment; helping students live a<br>meaningful life.                |                 |  |
| A spirit of teamwork and dedication                      |                          | nwork and dedication  | Improving one's ability to communicate and cooperate so as to integrate resources, collaborate with others, and solve problems.                         |                 |  |
| $\diamondsuit$ A sense of aesthetic appreciation         |                          | thetic appreciation   | Equipping students with the ability to sense and appreciate aesthetic beauty, to express themselves clearly, and to enjoy the creative process.         |                 |  |
|  | Course Schedule          |   |   |                 |  |
| Week   | Date                     | Subject/Topics Note   |   | Note            |  |
| 1  | 104/02/24 ~<br>104/03/01 | Review and introduction   |   |                 |  |
| 2  | 104/03/02 ~<br>104/03/08 | The two-factor factorial design                                 |   |                 |  |
| 3  | 104/03/09~<br>104/03/15  | Response surface  |   |                 |  |
| 4  | 104/03/16~<br>104/03/22  | The 2^k factorial design  |   |                 |  |
| 5  | 104/03/23 ~<br>104/03/29 | A single replicate of the 2 <sup>k</sup> design                 |   |                 |  |
| 6  | 104/03/30~<br>104/04/05  | Yates' algorithm for the 2^k design                             |   |                 |  |
| 7  | 104/04/06 ~<br>104/04/12 | Blocking and confounding in the 2 <sup>k</sup> factorial design |   |                 |  |
| 8  | 104/04/13 ~<br>104/04/19 | The 2^k factorial design in 2^p blocks                          |   |                 |  |
| 9  | 104/04/20~<br>104/04/26  | Two-level fractional factorial designs                          |   |                 |  |
| 10   | 104/04/27 ~<br>104/05/03 | Midterm Exam Week   |   |                 |  |
| 11   | 104/05/04 ~<br>104/05/10 | The general 2^(k-p) fractional factorial design                 |   |                 |  |
| 12   | 104/05/11~<br>104/05/17  | Alias structures in fractional factorials                       |   |                 |  |
|  |                          |   |   |                 |  |

| 13                         | 104/05/18~<br>104/05/24  | Resolution III/IV/V designs  |  |  |
|----------------------------|--|--|--|--|
| 14                         | 104/05/25~<br>104/05/31  | Nested and split-plot designs  |  |  |
| 15                         | 104/06/01~<br>104/06/07  | Graduate Exam Week   |  |  |
| 16                         | 104/06/08~<br>104/06/14  |  |  |  |
