

Tamkang University Academic Year 103, 2nd Semester Course Syllabus

Course Title	HEAT PIPE SCIENCE AND TECHNOLOGY	Instructor	KANG SHUNG-WEN
Course Class	TEBXD1A DOCTORAL PROGRAM, DEPARTMENT OF MECHANICAL AND ELECTRO-MECHANICAL ENGINEERING, 1A	Details	♦ Selective ♦ One Semester ♦ 3 Credits
D e p a r t m e n t a l A i m o f E d u c a t i o n			
I . To prepare students who have a comprehensive understanding of the principles of applied sciences and engineering to be innovators in the field of mechanical and electromechanical engineering. II . To train emerging professionals who possess a high level of expertise and ethical standards who will become independent research and development leaders in the industry. III . To motivate students who will pursue continuing education as a means to stay on the cutting edge of global competitiveness and meet changes in their careers and the workplace with confidence and ease.			
D e p a r t m e n t a l c o r e c o m p e t e n c e s			
A. Head: Knowledge of mechanical and electromechanical engineering. B. Hand: Hands-on skills and practical realization. C. Heart: Love of learning and innovation. D. Eye: Vision of progress and improvements.			
Course Introduction	The course includes the following:heat pipe Structure, design and construction, basic principle and theory, heat transfer capacity, origins and research in the world, application and limitations.		

The Relevance among Teaching Objectives, Objective Levels and Departmental core competences

I.Objective Levels (select applicable ones) :

- (i) Cognitive Domain : C1-Remembering, C2-Understanding, C3-Applying,
C4-Analyzing, C5-Evaluating, C6-Creating
- (ii) Psychomotor Domain : P1-Imitation, P2-Mechanism, P3-Independent Operation,
P4-Linked Operation, P5-Automation, P6-Origination
- (iii) Affective Domain : A1-Receiving, A2-Responding, A3-Valuing,
A4-Organizing, A5-Characterizing, A6-Implementing

II.The Relevance among Teaching Objectives, Objective Levels and Departmental core competences :

- (i) Determine the objective level(s) in any one of the three learning domains (cognitive, psychomotor, and affective) corresponding to the teaching objective. Each objective should correspond to the objective level(s) of ONLY ONE of the three domains.
- (ii) If more than one objective levels are applicable for each learning domain, select the highest one only. (For example, if the objective levels for Cognitive Domain include C3,C5,and C6, select C6 only and fill it in the boxes below. The same rule applies to Psychomotor Domain and Affective Domain.)
- (iii) Determine the Departmental core competences that correspond to each teaching objective. Each objective may correspond to one or more Departmental core competences at a time. (For example, if one objective corresponds to three Departmental core competences: A,AD, and BEF, list all of the three in the box.)

No.	Teaching Objectives	Relevance	
		Objective Levels	Departmental core competences
1	The educational purpose of the course is to develop and rationalize the theory and principles of heat pipe using basic principles, such as mass, momentum conservation, and energy equations.	C6	ACD

Teaching Objectives, Teaching Methods and Assessment

No.	Teaching Objectives	Teaching Methods	Assessment
1	The educational purpose of the course is to develop and rationalize the theory and principles of heat pipe using basic principles, such as mass, momentum conservation, and energy equations.	Lecture, Discussion, Problem solving	Written test, Report, Participation

This course has been designed to cultivate the following essential qualities in TKU students			
Essential Qualities of TKU Students		Description	
◇ A global perspective		Helping students develop a broader perspective from which to understand international affairs and global development.	
◇ Information literacy		Becoming adept at using information technology and learning the proper way to process information.	
◇ A vision for the future		Understanding self-growth, social change, and technological development so as to gain the skills necessary to bring about one's future vision.	
◇ Moral integrity		Learning how to interact with others, practicing empathy and caring for others, and constructing moral principles with which to solve ethical problems.	
◇ Independent thinking		Encouraging students to keenly observe and seek out the source of their problems, and to think logically and critically.	
◇ A cheerful attitude and healthy lifestyle		Raising an awareness of the fine balance between one's body and soul and the environment; helping students live a meaningful life.	
◇ A spirit of teamwork and dedication		Improving one's ability to communicate and cooperate so as to integrate resources, collaborate with others, and solve problems.	
◇ A sense of aesthetic appreciation		Equipping students with the ability to sense and appreciate aesthetic beauty, to express themselves clearly, and to enjoy the creative process.	
Course Schedule			
Week	Date	Subject/Topics	Note
1	104/02/24 ~ 104/03/01	INTRODUCTION	
2	104/03/02 ~ 104/03/08	Historical development	
3	104/03/09 ~ 104/03/15	Heat transfer and fluid flow theory (I)	
4	104/03/16 ~ 104/03/22	Heat transfer and fluid flow theory (II)	
5	104/03/23 ~ 104/03/29	Heat pipe components and materials	
6	104/03/30 ~ 104/04/05	Teaching administration observation day	
7	104/04/06 ~ 104/04/12	Extra Day Off For Tomb Sweeping Day	
8	104/04/13 ~ 104/04/19	Design guide(I)	
9	104/04/20 ~ 104/04/26	Design guide(II)	
10	104/04/27 ~ 104/05/03	Midterm test	
11	104/05/04 ~ 104/05/10	Heat pipe manufacture and testing	
12	104/05/11 ~ 104/05/17	Special types of heat pipe(I)	

13	104/05/18 ~ 104/05/24	Special types of heat pipe(II)	
14	104/05/25 ~ 104/05/31	Applications of the heat pipe(I)	
15	104/06/01 ~ 104/06/07	Applications of the heat pipe(II)	
16	104/06/08 ~ 104/06/14	Cooling of electronic components(I)	
17	104/06/15 ~ 104/06/21	Cooling of electronic components(II)	
18	104/06/22 ~ 104/06/28	FINAL TEST	
Requirement			
Teaching Facility		Computer, Projector	
Textbook(s)		Heat Pipes, Theory, Design and Applications, sixth edition, David Reay, Peter Kew, and Ryan Mcglan, Elsevier.	
Reference(s)		Heat Pipe Science and Technology, Amir Faghri, Taylor and Francis 1995	
Number of Assignment(s)		6 (Filled in by assignment instructor only)	
Grading Policy		◆ Attendance : 30.0 % ◆ Mark of Usual : % ◆ Midterm Exam : 30.0 % ◆ Final Exam : 40.0 % ◆ Other < > : %	
Note		This syllabus may be uploaded at the website of Course Syllabus Management System at http://info.ais.tku.edu.tw/csp or through the link of Course Syllabus Upload posted on the home page of TKU Office of Academic Affairs at http://www.acad.tku.edu.tw/CS/main.php . ※ Unauthorized photocopying is illegal.
