Departmental Aim of Education			
I. Cultivate the ability to conduct independent research and problem solving. II. Strengthen creativity and research capacity. III. Build profound professional knowledge in computer science and information engineering. IV. Engage in self-directed lifelong learning.			
Departmental core competences			
A. Independent problem solving ability. B. Independent innovative thinking ability. C. Research paper writing and presentation ability. D. Research & development (R&D) ability in information engineering. E. Project execution and control ability. F. Lifelong self-directed learning ability.			
Course Introduction	This course is mainly targeted at graduate-level students, at academic and industrial researchers working in the field, and also at engineering developing actual solutions for wireless LANs. This course contains basic concepts of wireless LANs, protocol stack of wireless LANs, and challenges of wireless LANs, and so on. Moreover, the students can realize the state-of-the-art technology via literature survey, paper presentation and discussions.		

The Relevance among Teaching Objectives, Objective Levels and Departmental core competences

I. Objective Levels (select applicable ones) :

- | | | |
|-------------------------|--|--|
| (i) Cognitive Domain | : C1-Remembering, C2-Understanding, C3-Applying, C4-Analyzing, C5-Evaluating, C6-Creating | |
| (ii) Psychomotor Domain | : P1-Imitation, P2-Mechanism, P3-Independent Operation, P4-Linked Operation, P5-Automation, P6-Origination | |
| (iii) Affective Domain | : A1-Receiving, A2-Responding, A3-Valuing, A4-Organizing, A5-Characterizing, A6-Implementing | |

II. The Relevance among Teaching Objectives, Objective Levels and Departmental core competences :

- (i) Determine the objective level(s) in any one of the three learning domains (cognitive, psychomotor, and affective) corresponding to the teaching objective. Each objective should correspond to the objective level(s) of ONLY ONE of the three domains.
- (ii) If more than one objective levels are applicable for each learning domain, select the highest one only. (For example, if the objective levels for Cognitive Domain include C3, C5, and C6, select C6 only and fill it in the boxes below. The same rule applies to Psychomotor Domain and Affective Domain.)
- (iii) Determine the Departmental core competences that correspond to each teaching objective. Each objective may correspond to one or more Departmental core competences at a time. (For example, if one objective corresponds to three Departmental core competences: A, AD, and BEF, list all of the three in the box.)
