

Tamkang University Academic Year 107, 1st Semester Course Syllabus

Course Title	SEMINAR (II)	Instructor	WU SHUO-JYE
Course Class	TLSXM2A MASTER'S PROGRAM, DEPARTMENT OF STATISTICS, 2A	Details	<ul style="list-style-type: none"> ◆ Selective ◆ 1st Semester ◆ 1 Credits
Departmental Aim of Education			
I. Cultivate students with ability to conduct research on statistical theory. II. Cultivate students with ability for statistical programming. III. Cultivate students to become statistical professionals with management capabilities. IV. Cultivate students with international perspectives.			
Departmental core competences			
A. Ability to conduct research of statistical theory. B. Data analysis skills. C. Ability to acquire interdisciplinary knowledge. D. Logical thinking ability. E. Statistical consulting ability.			
Course Introduction	The aim of this course is to help graduate students to understand the recent developments and results of statistical research in different areas. This course provides opportunities for students to practice the skills of oral presentation. A few invited talks are also given by some scholars in this semester. With the process of reporting and questioning, it is possible for the students to improve their skills in briefing. The invited talks can also increase the statistical knowledge of students. Furthermore, it intends to improve the research ability and quality of students.		

The Relevance among Teaching Objectives, Objective Levels and Departmental core competences

I. Objective Levels (select applicable ones) :

- (i) Cognitive Domain : C1-Remembering, C2-Understanding, C3-Applying,
C4-Analyzing, C5-Evaluating, C6-Creating
- (ii) Psychomotor Domain : P1-Imitation, P2-Mechanism, P3-Independent Operation,
P4-Linked Operation, P5-Automation, P6-Origination
- (iii) Affective Domain : A1-Receiving, A2-Responding, A3-Valuing,
A4-Organizing, A5-Characterizing, A6-Implementing

II. The Relevance among Teaching Objectives, Objective Levels and Departmental core competences :

- (i) Determine the objective level(s) in any one of the three learning domains (cognitive, psychomotor, and affective) corresponding to the teaching objective. Each objective should correspond to the objective level(s) of ONLY ONE of the three domains.
- (ii) If more than one objective levels are applicable for each learning domain, select the highest one only. (For example, if the objective levels for Cognitive Domain include C3, C5, and C6, select C6 only and fill it in the boxes below. The same rule applies to Psychomotor Domain and Affective Domain.)
- (iii) Determine the Departmental core competences that correspond to each teaching objective. Each objective may correspond to one or more Departmental core competences at a time. (For example, if one objective corresponds to three Departmental core competences: A, AD, and BEF, list all of the three in the box.)

No.	Teaching Objectives	Relevance	
		Objective Levels	Departmental core competences
1	Students are able to understand how to use academic statistics-related database and obtain the information about recent research and application in statistics.	C3	ABCD
2	Students are able to practice the skills of oral presentation about research paper, and discuss the questions raised by the audience.	C5	ABCD
3	Students are able to increase their statistical knowledge by attending the invited talks, and improve the ability and quality of their research studies.	C6	ABCD

Teaching Objectives, Teaching Methods and Assessment

No.	Teaching Objectives	Teaching Methods	Assessment
1	Students are able to understand how to use academic statistics-related database and obtain the information about recent research and application in statistics.	Lecture, Discussion, Appreciation, Simulation, Practicum	Practicum, Report, Participation
2	Students are able to practice the skills of oral presentation about research paper, and discuss the questions raised by the audience.	Lecture, Discussion, Appreciation, Simulation, Practicum, Problem solving	Practicum, Report, Participation

3	Students are able to increase their statistical knowledge by attending the invited talks, and improve the ability and quality of their research studies.	Lecture, Discussion, Appreciation, Simulation, Practicum	Practicum, Report, Participation

This course has been designed to cultivate the following essential qualities in TKU students

Essential Qualities of TKU Students	Description
◆ A global perspective	Helping students develop a broader perspective from which to understand international affairs and global development.
◆ Information literacy	Becoming adept at using information technology and learning the proper way to process information.
◆ A vision for the future	Understanding self-growth, social change, and technological development so as to gain the skills necessary to bring about one's future vision.
◇ Moral integrity	Learning how to interact with others, practicing empathy and caring for others, and constructing moral principles with which to solve ethical problems.
◆ Independent thinking	Encouraging students to keenly observe and seek out the source of their problems, and to think logically and critically.
◇ A cheerful attitude and healthy lifestyle	Raising an awareness of the fine balance between one's body and soul and the environment; helping students live a meaningful life.
◆ A spirit of teamwork and dedication	Improving one's ability to communicate and cooperate so as to integrate resources, collaborate with others, and solve problems.
◇ A sense of aesthetic appreciation	Equipping students with the ability to sense and appreciate aesthetic beauty, to express themselves clearly, and to enjoy the creative process.
