| Course Introduction | The purpose of this course is to describe the theory of operation concentrates on each of the "managers" in turn and show together. Then it introduces network organization concepts, management of network functions. In the second half-semes actual operating systems, how they apply the theories prese and how they compare with each other. | s how they wo security, ethic ster we will int | rk s, and roduce |

The correspondences between the course's instructional objectives and the cognitive, affective, and psychomotor objectives.

Differentiate the various objective methods among the cognitive, affective and psychomotor domains of the course's instructional objectives.

I. Cognitive: Emphasis upon the study of various kinds of knowledge in the cognition of the course's veracity, conception, procedures, outcomes, etc.

II. Affective: Emphasis upon the study of various kinds of knowledge in the course's appeal, morals, attitude, conviction, values, etc.

III.Psychomotor: Emphasis upon the study of the course's physical activity and technical manipulation.

| No. | Teaching Objectives | objective methods |
|-----|---|-------------------|
| 1 | Students are able to get familiar with all "managers" in operating systems | Cognitive |
| 2 | Students are able to understand operation principles of all managers in operating systems. | Affective |
| 3 | Students are able to analyze manager's functionalities in operating systems. | Cognitive |
| 4 | Students are able to integrate or understand all parts in operating systems as a whole. | Cognitive |
| 5 | Students are able to understand the importance of resource management from operating systems and their performance. | Cognitive |
| 6 | Students are able to get familiar with recent technologies in operating systems. | Cognitive |
| 7 | Enhancing students' ability to write read and speak technical English especially in the operating systems theory. | Psychomotor |
