Course Introduction	<p>Until the 1980s, most governments regarded global environmental problems as minor issues, marginal to their core national interests and international politics.</p> <p>With the rise of environmental movements in the industrialized countries and the appearance of well-publicized global environmental threats that could profoundly affect the welfare of all humankind - such as the depletion of the ozone layer or global climate change, this situation has changed. The course analyzes major political, economic and environmental trends underlying the emergence of global environmental politics.</p>

No.	Teaching Objectives	objective methods
1	Global environmental politics once was an obscure subfield in international relations, but has become part of all international problems nowadays like security, energy, trade, development, technology, and so forth. Since some of the most important political innovations at international level take place in this field, it is indispensable for students of international relations to get a sound understanding of actors, interests, policies and processes in this area.
