

## Tamkang University Academic Year 113, 1st Semester Course Syllabus

Course Title	SEMICONDUCTOR INDUSTRY FORUM (I)	Instructor	LEE, CHI-CHENG
Course Class	TSPDM1A INTERNATIONAL INTENSE MASTER'S PROGRAM IN SEMICONDUCTOR AND QUANTUM TESTING, DEPARTMENT OF PHYSICS (ENGLISH-TAUGHT PROGRAM), 1A	Details	<ul style="list-style-type: none"> <li>◆ General Course</li> <li>◆ Required</li> <li>◆ One Semester</li> <li>◆ 3 Credits</li> </ul>
Relevance to SDGs	SDG4 Quality education  SDG9 Industry, Innovation, and Infrastructure		
<b>Departmental Aim of Education</b>			
<p>I. Conveying professional knowledge: Teach the students to learn the core knowledge of physics, to obtain the basic skills needed for physics research, and to apply the professional knowledge to physics related technologies.</p> <p>II. Analyzing and solving problems: Guide the students to analyze problems, and to acquire the mathematical ability to quantify conceptual models and also the capability needed to think and to innovate in solving various scientific and engineering problems.</p> <p>III. Training for experimental techniques: Teach the students on how to carry out and to verify various experiments, and at the same time to have the mentality of working cautiously and the awareness in operating safely.</p> <p>IV. Expressing personal characteristics: Help the students to use their personal characteristics, like resolution, sincerity, and concentration, plus their professional skills to gain recognition among the executives and their peers.</p> <p>V. Cultivating team spirit: Train the students to have the organizational ability and the communicational skills to let them have the adaptability to integrate into a professional team, and to obtain the ability to bring out and to put to use the strength of the team to solve professional problems.</p> <p>VI. Building international views: Comply to the trends of globalization to build an international learning environment and opportunities in order to educate the students to continue in their self-advancements, to absorb new worldwide knowledge, and to become a professional with international views in their future perspective careers.</p>			
<b>Subject Departmental core competences</b>			
<p>A. To acquire the core basic knowledge in the field of physics. (ratio: 5.00)</p> <p>B. To understand the overall features of specific fields of physics. (ratio: 5.00)</p> <p>C. To obtain the mathematical ability to quantify concepts, models, and practical problems. (ratio: 10.00)</p> <p>D. To cultivate the basic ability to discover, to analyze, and to solve problems. (ratio: 20.00)</p> <p>E. To practice the actual handling of physics problems, and to have the ability to analyze and to interpret experimental data. (ratio: 20.00)</p> <p>F. To have the mentality to work cautiously and the awareness to operate safely. (ratio: 10.00)</p>			

G. To comprehend the trend of technological development and to acquire the knowledge and skills of other fields needed in their professional career.(ratio:20.00)

H. To have the spirit and capability in team cooperation.(ratio:10.00)

Subject Schoolwide essential virtues

1. A global perspective. (ratio:20.00)
2. Information literacy. (ratio:20.00)
3. A vision for the future. (ratio:10.00)
4. Moral integrity. (ratio:10.00)
5. Independent thinking. (ratio:10.00)
6. A cheerful attitude and healthy lifestyle. (ratio:10.00)
7. A spirit of teamwork and dedication. (ratio:10.00)
8. A sense of aesthetic appreciation. (ratio:10.00)

Course Introduction

The goal is to train the in-service master student with the practical case and working conditions, leading to a high-level knowledge background in the work. The principles of semiconductor company equipment and explore practical experiences are delivered by the industry part for a good cooperation between the school and company.

**The correspondences between the course's instructional objectives and the cognitive, affective, and psychomotor objectives.**

Differentiate the various objective methods among the cognitive, affective and psychomotor domains of the course's instructional objectives.

I. Cognitive : Emphasis upon the study of various kinds of knowledge in the cognition of the course's veracity, conception, procedures, outcomes, etc.

II.Affective : Emphasis upon the study of various kinds of knowledge in the course's appeal, morals, attitude, conviction, values, etc.

III.Psychomotor: Emphasis upon the study of the course's physical activity and technical manipulation.

No.	Teaching Objectives	objective methods
1	Understanding the semiconductor knowledge and practical case in various topics.	Cognitive

The correspondences of teaching objectives : core competences, essential virtues, teaching methods, and assessment

No.	Core Competences	Essential Virtues	Teaching Methods	Assessment
1	ABCDEFGH	12345678	Lecture, Discussion	Testing, Discussion(including classroom and online), Report(including oral and written)

### Course Schedule

Week	Date	Course Contents	Note
1	113/09/09 ~ 113/09/15	Introduction to the course	
2	113/09/16 ~ 113/09/22	Introduction to semiconductor I	Off-campus
3	113/09/23 ~ 113/09/29	Introduction to semiconductor II	Off-campus
4	113/09/30 ~ 113/10/06	Introduction to semiconductor process I	Off-campus
5	113/10/07 ~ 113/10/13	Introduction to semiconductor process II	Off-campus
6	113/10/14 ~ 113/10/20	Introduction to semiconductor process III	Off-campus
7	113/10/21 ~ 113/10/27	Introduction to semiconductor device I	Off-campus
8	113/10/28 ~ 113/11/03	Introduction to semiconductor device II	Off-campus
9	113/11/04 ~ 113/11/10	Midterm Exam (taken in the company)	Off-campus
10	113/11/11 ~ 113/11/17	Introduction to semiconductor device III	Off-campus
11	113/11/18 ~ 113/11/24	Advanced semiconductor manufacturing process I	Off-campus
12	113/11/25 ~ 113/12/01	Advanced semiconductor manufacturing process II	Off-campus
13	113/12/02 ~ 113/12/08	Advanced semiconductor manufacturing process III	Off-campus
14	113/12/09 ~ 113/12/15	Practical problem and discussion I	Off-campus
15	113/12/16 ~ 113/12/22	Practical problem and discussion II	Off-campus
16	113/12/23 ~ 113/12/29	Practical problem and discussion III	Off-campus
17	113/12/30 ~ 114/01/05	Practical problem and discussion IV	Off-campus
18	114/01/06 ~ 114/01/12	Final Exam (taken in the company)	Off-campus

Key capabilities	self-directed learning Problem solving
Interdisciplinary	
Distinctive teaching	
Course Content	Logical Thinking
Requirement	
Textbooks and Teaching Materials	Self-made teaching materials:Presentations Name of teaching materials: Self-made teaching materials will be prepared for presentations.
References	
Grading Policy	◆ Attendance : 30.0 %   ◆ Mark of Usual :   %   ◆ Midterm Exam : 25.0 % ◆ Final Exam : 25.0 % ◆ Other <discussion> : 20.0 %
