In	CourseIn recent years, the e-commerce market has rapidly grown, leading to the rise of various business models. This growth has highlighted the need for better operational management of commercial fleets. To tackle this issue, the course will explore several key topics, including the current landscape of the e-commerce market, real-time monitoring systems for commercial fleets, AI-driven dispatching and scheduling for delivery vehicles, and strategies for managing delivery performance. The course will also include case studies to help students gain a deeper understanding of these processes.
