Course Introduction

This course explores the design and operational models of long-term care services while analyzing the development trends of global and local long-term care policies. This course covers the core concepts of long-term care systems, needs assessment, resource allocation, and management strategies, focusing on improving the quality and efficiency of care services. Through practical case studies and scenario simulations, students will learn to address the challenges of an aging population and develop innovative management solutions to promote the sustainability of long-term care systems.
